

# Meeting notes

Date: 18:00 - 19:00 03/07

Participants: Deividas, Emilis, Julius, Agnė Brilingaitė

Notes by: Deividas Bendaravičius

Topics:

1. Discussion about the project state, project idea, workflow

We have scheduled a meeting with the project supervisor and discussed the current progress of the project, which was not a lot because we are still learning the React library. We then also discussed how the project should be carried out and what we should do first: zero-feature release should be the priority, we had some corrections on the model too. After that we had also talked a bit about the workflow and concluded the meeting.
