Meeting notes

Date: 16:00 - 16:40 02/28

Participants: Deividas, Emilis, Julius.

Notes by: Deividas Bendaravičius

Topics:

1. Task Assignments

2. Presentation Material

3. Project understanding

1) Task assignments:

UML Deployment Diagram	Deividas
Database RM/ER Model	Julius
Design Sketch	Emilis
Docker Research	Everyone
Research React and Node	Everyone

2) Presentation material:

For the upcoming presentation, we decided to present preliminary design of some system architecture, preliminary tools we will be using and talk more about what we are trying to achieve.

3) Project understanding:

We helped each other understand what is the motive and goal of the project. Found a <u>video</u> that might be useful for us to get on the same page. Additionally, decided to research similar projects

Additional notes:

- To plan a meeting with the supervisor

- Decide weather we need Docker and if yes, why?

- Will the web server be launched on node.js or nginx too?

- Research some CI
